

20%

The hourly-wage rate alone is not a strong predictor of automatability, despite some correlation between the two.

Comparison of wages and automation potential for US jobs

Ability to automate, % of time spent on activities that can be automated by adapting currently demonstrated technology

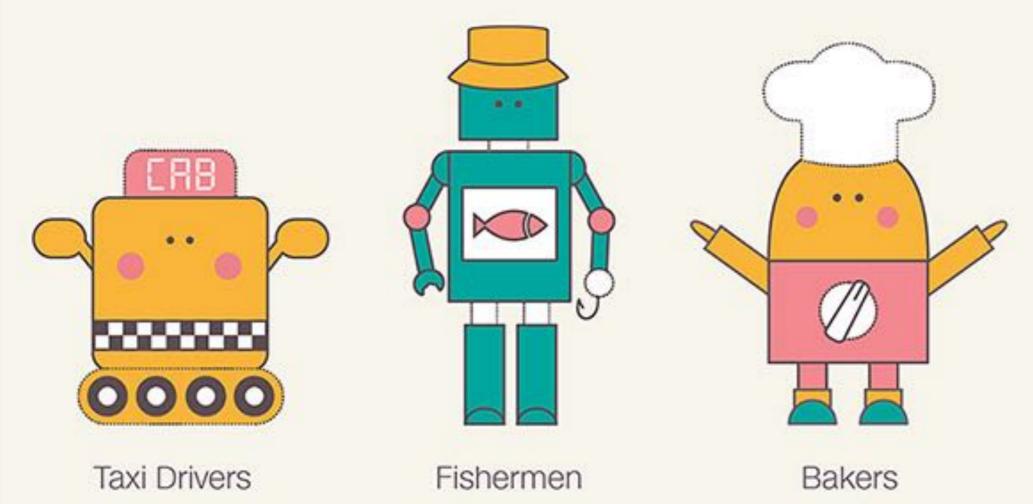

¹Our analysis used "detailed work activities," as defined by O*NET, a program sponsored by the US Department of Labor, Employment and Training Administration.

Only of Millennial women aspire to be in a leadership position ...

... whereas of Millennial men aspire for the same.

How will companies avoid losing this generation of female leaders?

| What drives generations? | Gen Z | Millennials | Gen X | Baby Boomers | |
|--------------------------|-------|-------------|-------|--------------|--------|
| Achieving high-level | 64% | 80% | 64% | 43% | Male |
| salary/compensation | 54% | 61% | 50% | 45% | Female |
| Achieving a high | 60% | 71% | 53% | 32% | Male |
| position/title | 52% | 50% | 44% | 33% | Female |
| Achieving a | 53% | 71% | 67% | 51% | Male |
| leadership position | 49% | 55% | 54% | 51% | Female |
